

**Award-winning design range expands:
CONNECTOR CLIC&GO brush and water cup sets new trends**

The CONNECTOR Paint Box has been named the product of the year 2012 by the German pro-k association for its innovative creative design and outstanding functionality. The paint pots can be individually combined, and thereby help children to learn about colours through play. The brilliant colours have high coverage and can be perfectly mixed, making them ideally suited for all techniques and uses in school and at home.

The accessories have also been awarded the pro-k prize "Product of the year 2012" - firstly for the CLIC&GO brush with its ergonomic, sliding grip designed to protect the brush hairs on the move. The innovative range has now been extended with the addition of a high demand size 10 robust synthetic brush.

Secondly, the CLIC&GO water cup, which can be easily stored thanks to its folding mechanism and which also serves as a brush rest with its wavy rim, is also an award-winning innovation. It is now available in the new colour blackberry.
