

New colour diversity: Fibre-tip Broadpen 1554 in fashion colours

The Broadpen 1554 for school, work and leisure is hugely popular with its characteristic translucent design. Its 0.8 mm line width promises easy and even writing pleasure, which endures thanks to its metal-clad tip.

The Broadpen 1554 is now also available in fashion colours grey, magenta and midnight blue. All colours come with permanent ink, and are therefore ideally suited for signing documents and contracts.
