

## New edition: Jumbo GRIP 16-piece metal tin

Children are full of ideas and enthusiasm. The “Playing & Learning” range takes them on a colourful, fascinating journey of discovery and encourages their creative juices to flow right from their very first attempts at drawing, colouring and writing. Carefully thought-out products, offering qualities and functions to match age-specific requirements, reliably accompany them through each phase of development in a way that is unique to them.

Faber-Castell’s colourful all-rounder products are presented in a new edition especially for Christmas. 16 selected, bright Jumbo GRIP coloured pencils with highly pigmented leads (including four new colours – white, magenta, turquoise and dark brown) are presented in a compact metal tin with a practical see-through lid. It’s the ideal gift idea for creative kids! Whether they are at school or on the go, their colouring adventures know no limits.

The GRIP coloured pencils don’t just make the world a more colourful place; they satisfy the most stringent quality requirements too. Their ergonomic triangular shape and the patented handle zone made from non-slip dots make it easier for children to hold the pencils, thereby allowing for safe and fatigue-free colouring and writing from the word go. The fascinating watercolour effects that children create with the brilliant colours give them a boost with their creative experiments too.
