Playful fun painting with the Faber-Castell app "Creative Kids"

Wobbling mice, crawling bugs and giggling colour-ghosts – the Creative Kids app brings colour pencil pictures to life! It offers numerous fascinating applications to young artists from the age of six who want to experience great painting adventures. It's easy as pie: step by step the app illustrates how moving images and animations can be created with paper, colour pencil and iPad. Children's fine motor skills, creativity and imagination are playfully trained at the same time.

The app can be downloaded from the Apple App Store for the iPad free of charge. Many more exciting applications are still to come over the coming months.
