

### **A shining arrangement: Essentio Aluminium**

The new Essentio Aluminium sets elegant accents: the ballpoint pen and fountain pen in a trendy metallic look with a barrel of coloured anodised aluminium and available in cool rosé, blue and black are guaranteed to cause a sensation on any desk. The appearance of the writing instruments is just as impressive as the comfort and functionality: the grooved grip zone makes them comfortable to hold. At the push of a button, the ballpoint pen, which has a large-capacity cartridge, hides its tip – ready for storage in a diary or in a jacket pocket. The fountain pen with its high-quality stainless steel nib is available in the widths M, F, EF and B.
